ISPL P2P AUDIT — DATA QUALITY & FILE HEALTH REVIEW

Target Entity: ISPL | Process: Procure-to-Pay (P2P) Audit | Files Reviewed: 8 Data Files

This report summarizes the data health check conducted on the 8 Excel files provided for ISPL's P2P Audit. It highlights what each file is used for, what specific issues were found in simple language, what impact these issues cause in the audit, and the exact action required from your IT / ERP team.

1. Executive Summary Table

File Name	Audit Role	Status	Main Issue Identified	Action Needed
Item Master ISPL.xls	Item Master	■ High Issue	Over 70% of active bought items are missing from this master list.	Provide full updated Item Master export.
GRPO Report Item Wise.xls	Goods Receipt (GRN)	■ High Issue	Missing 'Purchase Order No' (PO No) column.	Add PO No column to GRPO export query.
Purchase Register ISPL-C.xls	Purchase Invoices	■ High Issue	Missing 'Purchase Order No' (PO No) column.	Add PO No column to Purchase Register export.
BP MASTER-S.xls	Vendor Master	■ Medium Issue	Missing MSME classification; Vendor V000128 missing.	Add MSME category & missing vendor to BP Master.
Gate Entry Report.xls	Security Gate Log	■ Medium Issue	Missing Bill Date; 222 PO numbers not found in PO Report.	Add Bill Date & verify 222 PO numbers.
General Ledger.xls	GL Journal	■ Medium Issue	Missing Vendor Code column (uses GL Offset Account).	Include Vendor Code in GL export.
Purchase Order Report.xls	PO Details	■ Good	Clean formatting and complete data (1,649 POs).	None (Ready for use).
AP Credit Note-C.xls	Credit Memos	■ Good	Clean formatting and complete line data (613 rows).	None (Ready for use).

2. Detailed File Analysis & Audit Impact

1. Item Master ISPL.xls | Role: Material & Item Master ■ HIGH IMPACT

What this file is for: List of all raw materials, components, and items purchased or manufactured.

The Problem Found: **Severe Missing Data:** Over 70% of active items present in purchase receipts (GRPO) are missing from this master list. Out of 3,773 item codes in GRPO, 2,701 items do not exist in this file.

What it Causes in Audit: The audit system cannot verify item descriptions, standard unit prices, or categories for missing items. Quantity and rate variance reports will flag these items as 'Unregistered Master Items'.

Action Required: Request your IT/SAP team to download a complete, updated export of the Item Master containing all currently active item codes.

2. GRPO Report Item Wise.xls | Role: Goods Receipt (GRN)

■ HIGH IMPACT

What this file is for: Record of all physical goods received and accepted at the factory warehouse.

The Problem Found: **Missing Column:** The 'Purchase Order Number' (PO No) column is missing from this file export.

What it Causes in Audit: The system cannot directly link received goods back to their original Purchase Order numbers. 3-Way Matching (PO vs Goods Receipt vs Invoice) cannot automatically verify if correct PO quantities were received.

Action Required: Ask your IT team to include the **'PO No' (or Base PO Ref)** column in the GRPO report export query.

3. Purchase Register Item Wise ISPL-C.xls | Role: Purchase Invoices

■ HIGH IMPACT

What this file is for: Complete register of vendor tax invoices entered into accounting.

The Problem Found: **Missing Column:** The 'Purchase Order Number' (PO No) column is missing from this register.

What it Causes in Audit: Invoice line items cannot be automatically cross-matched to originating PO numbers, making it difficult to detect over-billing against PO price limits.

Action Required: Ask your IT team to add the **'PO No'** column into the Purchase Register export query.

4. BP MASTER-S.xls | Role: Vendor Master

■ MEDIUM IMPACT

What this file is for: Directory of all approved suppliers, vendors, and business partners.

The Problem Found: **Missing MSME Field & Vendor Code:** No MSME / Udyam registration classification column (Micro, Small, Medium, Non-MSME) is provided. Additionally, active vendor **V000128** is missing from this file.

What it Causes in Audit: The system cannot automatically classify vendors under the legal **45-day MSME payment rule**. Transactions for vendor V000128 will show as 'Unregistered Vendor'.

Action Required: Provide an updated Vendor Master file that includes the **MSME Category** column and includes vendor V000128.

5. Gate Entry Report.xls | Role: Security Gate Entry Log

■ MEDIUM IMPACT

What this file is for: Record of physical trucks and material inward entries logged at factory security gates.

The Problem Found: **Missing Bill Date & Unmatched POs:** Lacks Vendor Bill Date column. Furthermore, 222 PO numbers referenced at the gate (e.g. PO #13267, #13054) do not exist in the Purchase Order Report file.

What it Causes in Audit: Cannot calculate exact delivery delay between Vendor Invoice Date and Gate Entry Date. Gate entries for those 222 POs cannot be verified against official POs.

Action Required: Ask IT to include 'Vendor Bill Date' in the gate entry export, and check if those 222 POs belong to another branch or series.

6. General Ledger.xls | Role: Accounting Journal Ledger

■ MEDIUM IMPACT

What this file is for: Detailed financial transaction journal showing all account entries and payments.

The Problem Found: **Missing Vendor Code Column:** The file exports GL Offset Account numbers instead of specific Vendor Codes (V000xxx). Headers use 'Debit (LC)' and 'Credit (LC)'.

What it Causes in Audit: Payment aging and vendor ledger reconciliation cannot map accounting entries directly to individual vendor codes.

Action Required: Ensure GL export query includes the **Vendor Code (BP Code)** column alongside general ledger account numbers.

7. Purchase Order Report.xls | Role: PO Header & Line Items ■ GOOD CONDITION

What this file is for: Official Purchase Orders issued to vendors containing ordered quantities, rates, and terms.

The Problem Found: **No Issues Found:** File is cleanly structured with 6,869 rows and 1,649 unique PO numbers. All key columns are 100% complete.

What it Causes in Audit: None. File is ready for full audit processing.

Action Required: No action required for this file.

8. AP Credit Note-C.xls | Role: Credit Notes & Adjustments ■ GOOD CONDITION

What this file is for: Record of vendor credit notes, price deductions, and returned goods.

The Problem Found: **No Issues Found:** File is cleanly structured with 613 rows. All required line fields are present.

What it Causes in Audit: None. File is ready for full audit processing.

Action Required: No action required for this file.

3. Quick Action Checklist for IT / SAP Team

Please share the following checklist with your IT / ERP team so they can re-export the files with the missing columns:

Item #	Target File	Exact Action Required from IT Team
1	Item Master ISPL.xls	Export a complete Item Master containing all active item codes (currently >70% of active items are missing).
2	GRPO Report Item Wise.xls	Add the **PO No** (or Base PO Ref) column into the GRPO report export.
3	Purchase Register ISPL-C.xls	Add the **PO No** column into the Purchase Register export.
4	BP MASTER-S.xls	Add the **MSME Category** column (Micro / Small / Medium / Non-MSME) and include vendor **V000128**.
5	Gate Entry Report.xls	Add **Vendor Bill Date** column, and verify the 222 missing PO numbers.
6	General Ledger.xls	Include the **Vendor Code (BP Code)** column alongside account numbers.
